## Sunday, Sept. 22, Oslo (Official program starts at 7:00 pm)

**10:00 am to 1:00 pm - Bike Tour, “Oslo off the Beaten Path”** with Viking Biking. Discover an alternative Oslo, full of street art, hip cafés, surprising waterfalls, great food and award winning coffee. During this approximately 3-hour bike tour, we will ride the path along the Akerselva River, and a stop at the heart of Oslo’s food scene, the indoor market “Mathallen.” Be amazed by rushing waterfalls in the middle of the city, just blocks from the trendy Grünerløkka neighborhood. And an absolute must is a stop at the modern Opera and the exciting urban development around it, including a stop at Oslo's newest urban beach. (Optional)

**1:00 pm - Lunch on your own**

**2:00 pm - Meet the group back at the hotel to take a rental van to Kistefos Museum**

**3:15 pm - Arrive Kistefos Museum, Samsmoveien 41, N-3520 Jevnaker, Norway**

Spend the rest of the day and tomorrow morning in Amsterdam looking at projects including Haut on the Amstel, PATCH 22 and Freebooter

HAUT, the 21-story residential building with 55 apartments by the River Amstel in Amsterdam, is a serious contender to become the tallest timber hybrid tower in the world. The innovative wooden high-rise construction and the energy-generating facades make HAUT a prototype of innovative, sustainable construction. To be completed in 2020. PATCH22, a 98-ft. tall wood high-rise, is a striking, oversized wooden building with a great degree of flexibility and a high level of sustainability. PATCH22 employs wood as the principal material for both the structure and facade. The structural wood on the outside of the building is redwood while the facade is Douglas fir. On the interior, the architects used glulam for the columns and beams and CLT for load-bearing walls. Freebooter by Dutch architecture studio GG-loop is a pair of prefabricated apartments with timber louvres positioned to regulate the levels of light entering the building. The block was made from steel and cross-laminated-timber (CLT) and was prefabricated off site. It took three weeks to install all four floors, and the whole project took only six months to build.
